

Course Code DSN4092	Capstone Project - Phase 2	Course Type	PJ		
		Credits	5		
Prerequisite: The course to be registered after completing the third of year of undergraduate studies, and also completing the Capstone Project Phase - 1.					
Course Objectives: To apply the knowledge acquired in studies in to real time problem solving in the field engineering and technology to produce the outcomes for the betterment of society.					
Course Outcomes: At the end of this course, the students will be able to 1. Produce the outcomes for the real time problems in the field of engineering and technology 2. Applying their foundation skills obtained in the studies, analyze the alternatives 3. Demonstrating the concepts with the help of modern tools 4. Deployment or deliver the final project					
Student Outcomes (SO) : 1, 2, 3, 4, 5, 6, 7					
Guidelines: The capstone projects can either be done at Inhouse or Industry. The industry project to be carried out in the industries approved by the University. The duration of the capstone project is 1 semester (6 Months). The capstone project to be carried out under supervision of a Supervisor from Industry or University. Students need to prepare the capstone project report as per the University format with Certificates and other necessary documents. The same to be submitted to the Office of the Concerned School after the completion of the capstone project. The students need to attend the reviews conducted by the University for capstone project. The schedule of the reviews will be announced by the School.					
Mode of Evaluation: The four reviews will be conducted by the Panel constituted by the School as per University Norms.					
Review 0: This is zeroth review and it will be conducted only for screening the problem statements. It does not carry any scores. It will be conducted in at the beginning of the Semester after the capstone project registration.					
Review 1: This is first review will be conducted at the start of semester to check the progress of the capstone project work. It will include Project Development and Implementation, Testing, Demonstration, and Validation. It will be conducted for 50 marks as per below rubrics.					
Progress in project implementation and development	Quality and functionality of the final project product	Evidence of problem solving and adaptability	Effective use of technology and resources	Consistency and effectiveness of testing and validation procedures	Quality of results and findings
10	10	10	05	10	5

Review 2: This is second review will be conducted at the end of the semester to check the progress of the capstone project work. It includes Final Project Implementation, Testing, demonstration, and Validation documentation report. It will be conducted for 50 marks as per below rubrics.

Rigor and effectiveness of testing and validation procedures	Clarity and organization of the final presentation	Quality of the final project report Hardcopy – 2 (Phase-2), including documentation of all phases	Document ation of any issues or challenges faced	Plans for any necessary revisions or improvements	Demonstra tion of the completed project and its features	Ability to answer questions and explain project outcomes
